The Opportunities

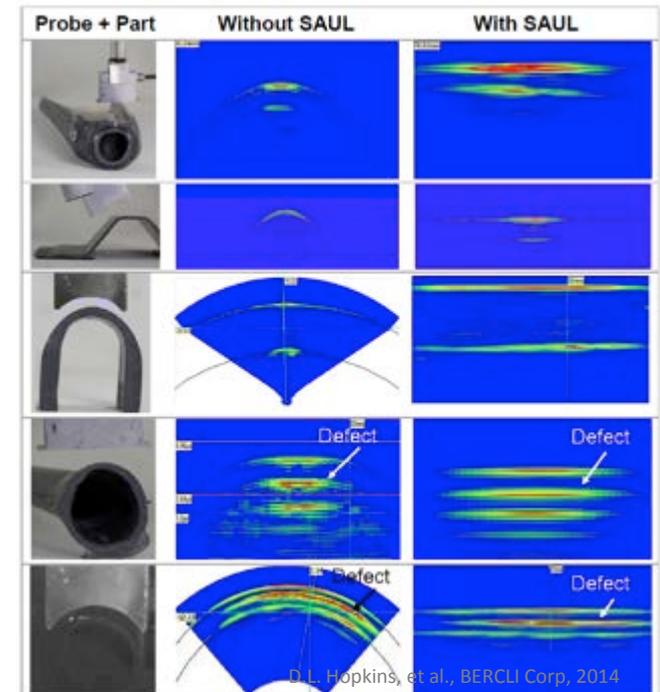

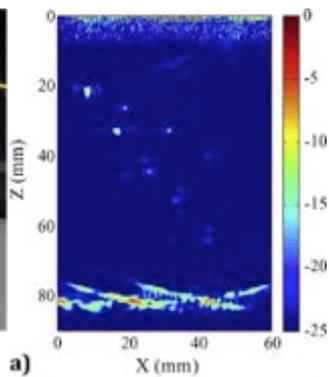

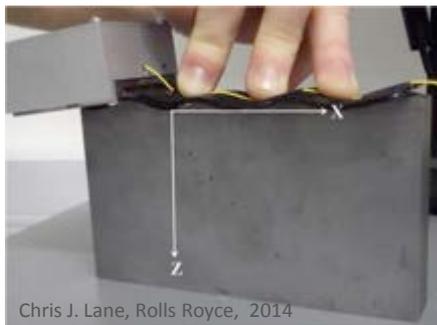

- Improve characterization of cracks in curved surfaces such as in and around dents, wrinkle bends, and curved fittings
- Improve system performance of ILI Crack tools when inspecting Natural Gas Liquid (NGL) pipelines
- Development of hardware and data acquisition systems that support the use of available sophisticated scientific computing and visualization techniques

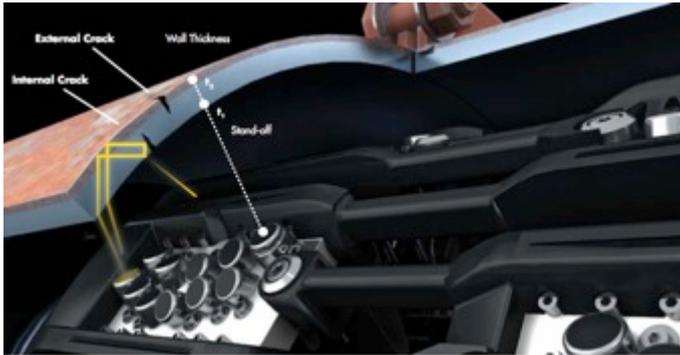

Flexible and Surface Adaptive Ultrasonic Arrays & Shape Sensing Fibers

Inspecting curved surfaces of jet engine parts & aircraft structures

Improve UT ILI Crack Tools for Inspecting Natural Gas Liquids (NGL) Pipelines

Keeping signal attenuation within a target range of multi-phase fluid NGLs is a challenge

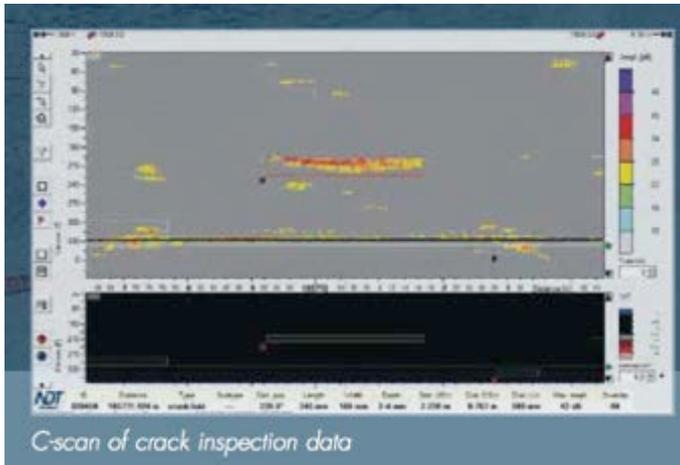

NGL Attribute Summary			
Natural Gas Liquid	Chemical Formula	Applications	End Use Products
Ethane	C_2H_6 	Ethylene for plastics production; petrochemical feedstock	Plastic bags; plastics; anti-freeze; detergent
Propane	C_3H_8 	Residential and commercial heating; cooking fuel; petrochemical feedstock	Home heating; small stoves and barbeques; LPG
Butane	C_4H_{10} 	Petrochemical feedstock; blending with propane or gasoline	Synthetic rubber for tires; LPG; lighter fuel
Isobutane	C_4H_{10} 	Refinery feedstock; petrochemical feedstock	Alkylate for gasoline; aerosols; refrigerant
Pentane	C_5H_{12} 	Natural gasoline; blowing agent for polystyrene foam	Gasoline; polystyrene; solvent
Pentanes Plus*	Mix of C_5H_{12} and heavier	Blending with vehicle fuel; exported for bitumen production in oil sands	Gasoline; ethanol blends; oil sands production

C indicates carbon, H indicates hydrogen; Ethane contains two carbon atoms and six hydrogens.
*Pentanes plus is also known as "natural gasoline." Contains pentane and heavier hydrocarbons.
